

“Now Creating Tomorrow’s Possibilities”

CYBER WORLD GLOBAL RESOURCES HUB

Where humanitarian projects, new greener businesses, eco-communities and visionaries for global change collaborate, share, participate and meet, supporting one another, focalizing around and bringing into being viable solutions for a sustainable future.

At this time of Great Change on Planet Earth, supporting grassroots projects that optimize broad-based human potential, creativity and brilliance promises to carry us into a viable and sustainable future. Virtual Earth Village will offer an unlimited online hub for those around the world coalescing thought, vision, action and learning, to implement solutions and improve them through collaborative thought strategies.

Virtual Earth Village is to be a communication and community hub for engaging the public at large as well as those developing solutions for humanity, the environment, clean and healthy soil-air-water, education, supplying humanitarian needs, local food growing, communities as “islands of the future,” new technologies, currencies, free energy and more.

PLEASE WATCH VIDEO(click on or post this link in browser <http://youtu.be/Dx4nKHovYQI>) with overview for funders on how we will fill a critical global need to coalesce projects and information, while also accumulating passive income, and thus be able to offer resources to assist with developing more global projects.
